

MOSER ENERGY SYSTEMS

POWER WHERE YOU NEED IT. WHEN YOU NEED IT.

• Oil and Gas • Commercial and Industrial • Microgrid • Events • Demand Response and Grid Interactive

- RELIABLE
- RESILIENT

- EFFICIENT
- ENVIRONMENTALLY CONSCIOUS

WE DESIGN, ENGINEER AND MANUFACTURE IN A WORLD-CLASS FACILITY

Founded in 1973 by Jim and Kathy Moser in Casper, Wyoming, Moser built its business and reputation over multiple decades as a leading provider of engine service and repair for the oil and gas industry. In the early 2000s Moser made a significant industry innovation when Moser successfully tested a generator in the field using wellhead gas produced as a byproduct in oil production. This innovation allowed for a significant reduction in natural gas flaring and a reduction in oilfield operating expenses. Today, Moser's generators and services are known as the gold standard for durability and reliability. Moser continues its legacy of innovation and industry-leading generators with a full line of natural gas generators, diesel generators, and HybridGen systems.

In early 2020, Moser Energy consummated a transformational transaction to strengthen the company strategically and financially when WestFront Capital Group (<http://www.westfrontcapital.com/>) and Hilltop Opportunity Partners (<http://www.hilltop-holdings.com/hop>) invested in the company. The Moser founding family remain owners in the business, alongside Hilltop and WestFront.

We offer a full range of generator products and services to fit your needs. We design, engineer, and manufacture our natural gas- and diesel-powered industrial generators in our world-class facility located in Casper, Wyoming.

- **NATURAL GAS GENERATORS**
- **DIESEL GENERATORS**
- **PORTABLE GENERATORS**
- **HYBRIDGEN**
- **FABRICATION SERVICES**
- **FIELD SERVICE & REPAIR**
